

## LNG Pump Lifter

KHC Pump Lifter is an efficient partner in performing tasks reliably and easily with the load by the people who use them. KHC offers flexible and cost efficient pump lifter solution for any job in the work place.

The KHC Pump Lifter is built with double drum hoist to ensure ultra high lifting capacity and hoist safety for lifts of 10-100m. These lifting pumps have high durability design, with low vibration and are appropriate for high installations, on top of tanks such as the type shown to the right.

- Capacity of 6t and 100m lifting height.
- Application for off-shore and on-shore.
- Oil and gas industries for gas storage tanks and processing facilities.
- Main hoist as well as auxiliary hoist arrangement depending on requirements.
